EDUCATION

The University of Auckland

Ph.D. in Computer Science

Auckland, New Zealand

November 2018 – April 2022

- Supervisors: Jiamou Liu and Bakhadyr Khoussainov
- Thesis: *From One to Infinity: New Algorithms for Reinforcement Learning and Inverse Reinforcement Learning* (submitted in September 2021)

The University of Auckland

First Class Honours in Computer Science

Auckland, New Zealand

July 2017 – July 2018

- Dissertation: *Network Building: Methodological Foundations and Algorithmic Analysis*

Beijing Institute of Technology

Bsc in Computer Science & Technology

Beijing, China

August 2013 – June 2017

WORK EXPERIENCE

The University of Auckland

Research Fellow

Auckland, New Zealand

June 2021 – Present

- I am currently a postdoctoral research fellow affiliated with the School of Computer Science at The University of Auckland.

DAMO Academy, Alibaba

Research Intern

Beijing, China

September 2020 – January 2021

- I served as a principal contributor and programmer of a research project. I proposed a novel framework that combines deep learning and bandit techniques to enhance the efficiency and accuracy of the recommender system. The performance bound was derived using statistical learning tools. The paper has been published, and a prototype is ready to be deployed to support the online business.

RESEARCH INTERESTS

My research interests span a spectrum of reinforcement learning, computational game theory and multi-agent systems. Recently, I have aimed to solve issues modelled as multi-agent systems from the game-theoretic and reinforcement-learning perspectives. Along this line, my ultimate goal is to reinforce the insights into theories of applying game theory in conjunction with reinforcement learning. Lately, my focus has moved to reinforcement learning in games with massive agents. I attempt to explore exciting results in such scenarios by combining reinforcement learning and the mean-field theory. In addition to my research interests in reinforcement learning, game theory and multi-agent systems, I am also working on applying reinforcement learning in natural language processing and automatic reasoning.

SUPERVISION

BSc (Honours) Students

- **Yiwei Qi.**

The University of Auckland.

February 2022 – November 2022 (expected)

Topic: *Building A Game-Playing Agent Using Decision Theory*

TEACHING

- **COMPSCI 220: Algorithms and Data Structures**

Guest Lecturer, The University of Auckland.

Semester 1, 2022

- **COMPSCI 399 Capstone: Computer Science**

Project Supervisor, The University of Auckland.

Semester 2, 2021

ACADEMIC SERVICES

- **Conference Reviewer:** ICNLP 2022, BSCI 2022.
- **Journal Reviewer:** Social Network Analysis and Mining (SNAM).
- **Web Master:** AAMAS 2022, BSCI 2022, BSCI 2021, BSCI 2020

AWARDS

- AAMAS 2022 Scholarship *April 2022*
- Google Global PhD Fellowship Nomination (Australilia & New Zealand) *August 2020*
- Best Paper Award, BSCI 2019. *July 2019*
- Summer Scholarship Funding from PDH Research Partnership. *November 2018*
- University of Auckland Doctoral Scholarship. *October 2018*

SELECTED PUBLICATIONS

- **GAME THEORY & REINFORCEMENT LEARNING**

- **Individual-Level Inverse Reinforcement Learning for Mean Field Games**

Yang Chen, Libo Zhang, Jiamou Liu, Shuyue Hu. *The 21st International Conference on Autonomous Agents and Multi-agent Systems. AAMAS 2022.*

- **Interconnected Neural Linear Contextual Bandits with Upper Confidence Bound Exploration**

Yang Chen, Miao Xie, Jiamou Liu, Kaiqi Zhao. *26th Pacific-Asia Conference on Knowledge Discovery and Data Mining. PAKDD 2022.*

- **Adversarial Inverse Reinforcement Learning for Mean Field Games**

Yang Chen, Michael Witbrock, Jiamou Liu. *arXiv 2021.*

- **Social Capital Games as A Framework for Social Structural Pattern Emergence**

Yang Chen, Jiamou Liu. *IEEE/ACM International Conference on Advances in Social Networks Analysis and Mining. ASONAM 2020.*
